Duration	3 mins 1 sec
Grade	**15.00** out of 15.00 (**100**%)

Question **1**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

a. When the item is the last element in the array

b. When the item is somewhere in the middle of the array ✓

c. Item is the last element in the array or item is not there at all

d. When the item is not the array at all

Question **2**

Correct

Mark 1.00 out of 1.00

Finding the location of a given item in a collection of items is called

a. Finding

b. Mining

c. Discovering

d. Searching ✓

Question **3**

Correct

Mark 1.00 out of 1.00

What is the advantage of binary search over linear search?

a. Binary search can find multiple instances of the target element

b. Binary search works on unsorted lists

c. Binary search has a lower time complexity on large, sorted lists ✓

d. Binary search does not require dividing the list

Question **4**

Correct

Mark 1.00 out of 1.00

During a linear search, what is the maximum number of comparisons needed to find an element in a list of size n?

a. n-1
b. n/2
c. n ✓
d. log n

Question **5**

Correct

Mark 1.00 out of 1.00

_____sort is the simplest sorting algorithm that works by repeatedly swapping the adjacent elements in case they are unordered in n-1 passes.

a. Complexity
b. Insertion
c. Bubble ✓
d. Selection

Question **6**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

a. The search stops immediately ✓
b. The search starts over from the beginning
c. The search continues until the end of the list
d. The search backtracks to find duplicate elements

Question **7**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Deleting elements from a list
b. Inserting elements into a list
c. Sorting elements in a list
d. Determining whether an element is present in a list ✓

Question **8**

Correct

Mark 1.00 out of 1.00

What is the first step in binary search?

a. Sort the list
b. Compare the target element with the middle element in the list ✓
c. Compare the target element with the first element in the list
d. Divide the list into two equal parts

Question **9**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Binary search
b. Linear search ✓
c. Hash search
d. Both (1) & (3)

Question **10**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

a. There should be direct access to the middle element in any sublist
b. Number values should only be present

Number values should only be present

c. There must be a mechanism to delete and/or insert elements in the list ✓
d. The list must be sorted

Question **11**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. In the entire list
b. In the right sublist
c. At the beginning of the list
d. In the left sublist ✓

Question **12**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the middle of the list
b. In the left sublist
c. In the right sublist ✓
d. At the beginning of the list

Question **13**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

a. Binary search
b. Dynamic search
c. Hashing
d. Linear search ✓

Question **14**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. An error is raised
b. The search is considered unsuccessful ✓
c. The last element is returned
d. The first element is returned

Question **15**

Correct

Mark 1.00 out of 1.00

In binary search, what happens if the middle element does not match the target element?

a. The search continues from the beginning
b. The search stops
c. The search continues in the left or right sublist ✓
d. The list is sorted
